Women in Mathematics Day

Università degli Studi di Torino, Dipartimento di Matematica, Aula 4

Program

09:00–09:30	Susanna Terracini Anna Maria Fino	Institutional greetings
First session		
09:30–10:10	Lucrezia Bottegoni	<i>On idempotent completion in category theory</i>
	Giulia Chiari	<i>Mathematical oncology: an analysis of cancer population dynamics and radio-therapy treatments towards personalized medicine</i>
10:10–10:30		Coffee break
Second session		
10:30–11:30	Beatrice Pitton	<i>Definable subsets in generalized descriptive set theory</i>
	Francesca Ballatore	<i>A continuum mechanical model to predict the growth of brain tumours and the deformation of white matter tracts</i>
	Gessica Alecci	<i>R-Algebras of Linear Recurrent Sequences and Pell hyperbolas in DLP-based cryptosystems</i>
11:30–11:50		Coffee break
Third session		
11:50–12:50	Asia Mainenti	<i>Balanced Hermitian metrics</i>
	Elisa Paparelli	<i>Optimal control problem in Covid-19 crisis: economic collapse vs health system overcrowding</i>
	Elena Scalambro	<i>A woman in mathematics: Maria Gaetana Agnesi from the history to classrooms</i>
12:50–14:30		Lunch break
Afternoon session (in italian)		
14:30–15:30	Anna Maria Cherubini	
15:30–16:00		Coffee break
16:00–17:30	Anna Maria Cherubini Gabiella Caporaletti Giulia Ferrari Arianna Montorsi	Round table
